Mobile: +91-9044338905

SKILLS

- **Languages:** Python, C, JavaScript
- **Technologies:** HTML, CSS, Linux, Virtualization
- **Databases/Tools:** MySQL, Git, GitHub, Figma, Cisco Packet Tracer
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability

PROJECTS

Smart Drainage Monitoring System | Ongoing

June 2026

- Designed a practical smart drainage monitoring concept to efficiently track drainage water flow and detect potentially harmful substances.
- Proposed an innovative sensor-based monitoring approach to effectively improve sanitation monitoring and early detection of drainage-related issues.
- Explored a scalable cloud-based monitoring architecture to continuously collect sensor data and generate alerts for predefined conditions.
- Planned an automated notification system to communicate critical drainage conditions to the designated monitoring area.
- **Tech Stack:** Sensors, IoT, Cloud Computing, AWS, Data Monitoring, Alert System

Arduino Sensor Learning Kit | Hardware-Based Educational Project

Nov 2025 - Dec 2025

- Developed an interactive Arduino-based learning kit to effectively help beginner Electrical Engineering students understand Arduino and sensor concepts through hands-on learning.
- Integrated Arduino with multiple sensors to practically demonstrate their working principles and real-world applications.
- Designed a user-friendly, toy-like hardware setup that encourages students to actively experiment with electronic components and understand sensor operations.
- **Tech Stack:** Arduino, Sensors, Embedded Systems, Microcontroller Programming, Hardware Prototyping

AR/VR Virtual Space Museum | GitHub

May 2026

- Developed an interactive virtual space museum to effectively introduce users to Augmented Reality and Virtual Reality through an immersive digital environment.
- Designed an engaging virtual experience that allows users to explore space-related content while practically understanding the potential applications and future scope of AR/VR technologies.
- Implemented a user-friendly virtual environment to encourage exploration and provide an interactive approach to learning about emerging technologies.

CERTIFICATES

- Generative AI for All | [PW/Microsoft](#) Apr 2026
- Introduction to Cloud Computing | [Infosys](#) Mar 2026
- Programming Fundamentals using Python | [Infosys](#) June 2026

ACHIEVEMENTS

- **Achieved Top 9** position in a Naukri Campus coding contest, demonstrating strong competitive programming and problem-solving ability.
- **Secured a Top 30 position** in **CodeXtreme 4.0 – C Programming**, demonstrating strong programming and problem-solving skills at Lovely Professional University.

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.76** Aug 2025 - Present
- **Umaraman Inter College** Amethi, Uttar Pradesh
Higher Secondary Education; **Percentage: 72%** April 2024 - Mar 2025
- **St. Marry Sr Sec Convent Sch** Amethi, Uttar Pradesh
Higher Secondary Education; **Percentage: 72%** April 2021 - Mar 2022
